

Frontend Specification Document (FSD)

CampusFind Pro - Component Architecture and UI Layout Specs

1. CSS Design System and Styling Tokens

The user interface relies on a modern glassmorphic theme styled via Bootstrap 5 and customized vanilla CSS styles. The theme color variables include primary Indigo (#4f46e5), deep Navy (#1e1b4b), and soft slate background layers.

2. Typography & Responsive Layout Grid

- **Curated Font Families:** Headings use Google Fonts (Outfit or Inter) to deliver a modern, premium appearance.
- **Flexbox & Grid Layouts:** The system utilizes fully responsive layouts that render beautifully across mobile devices, tablets, and desktop views.
- **Dark Mode toggle:** Preserves brightness preferences in the browser's localStorage and updates CSS variables dynamically on client load.
