

# Feature Ticket List

CampusFind Pro - Project Roadmaps and Task Checklist

---

## 1. Release 1.0 Development Board

Below is the itemized list of features, migrations, and bug fixes tracked for the stable Release 1.0 launch:

- **[CF-101] MySQL to MongoDB Atlas Database Layer Migration:** Transition raw SQL commands to driver-level document query sets (Completed).
- **[CF-102] Dynamic Site Protocol Detection:** Auto-resolve HTTPS/HTTP environments on Render (Completed).
- **[CF-103] Remote Google Avatar Synchronization:** Auto-update broken local profile pictures with remote OAuth links (Completed).
- **[CF-104] Recursive BSON Query Parser:** Implement castFilterIds to automatically map string IDs to ObjectIds in the database class (Completed).
- **[CF-105] Brevo.com API Integration:** Build an HTTP REST cURL client for sending reset links and codes (Completed).
- **[CF-106] Production Base URL Override:** Force reset links in emails to use live domains instead of localhost (Completed).
