

Data Compliance Policy

CampusFind Pro - Auditing, Regulatory, and Safety Specifications

1. Academic Regulatory Compliance (FERPA)

Under educational safety regulations, student directory records must be protected. CampusFind Pro ensures compliance by restricting access to personal student email addresses and names behind strict authentication layers.

2. Audit Trails & Logs Compliance

- All state modifications (claims, reports, configuration changes) log the user ID and action timestamp within the `activity_logs` collection for compliance audits.
- All personal data is encrypted in transit using SSL/TLS, meeting global data protection compliance guidelines.
