

Data Compliance Policy

CampusFind Pro - Auditing, Regulatory, and Safety Compliance Specifications

1. Academic Regulatory Compliance (FERPA)

CampusFind Pro complies with the Family Educational Rights and Privacy Act (FERPA) guidelines by restricting student directory access. Name and email listings are locked behind secure authorization layers, preventing public access or indexing.

2. Auditing, Access Logs & GDPR Alignment

- **Auditable Trails:** Every data modification (creating reports, claiming items, updating status, changing settings) logs the active user ID and timestamp inside the `activity_logs` collection for compliance audits.
- **GDPR Alignment:** All personal records support the "Right to be Forgotten" via complete account deletion hooks.
- **Data Portability:** Users can request a JSON export of their active logs and reports.
