

Frontend Specification Document (FSD)

CampusFind Pro - Design Systems, Typography, Components, and Dark Mode Specs

1. Visual Guidelines & Color System

The user interface utilizes a premium glassmorphic style. Design tokens consist of curated color schemes: primary Indigo (#4f46e5), secondary Slate (#64748b), deep Indigo-Navy headers (#1e1b4b), and transparent glass-panel cards with thin borders (#eaeaea) and subtle shadows to create high visual depth.

2. Typography, Layout Grid & Responsiveness

- **Typography:** Core headings use Outfit, while body fonts use Inter. Default sans-serif fonts are prohibited to ensure a premium feel.
- **Responsive Layout:** Handled through Bootstrap 5 grids, supporting smooth responsive flows on mobile screens, tablets, and full desktops.
- **Transitions:** Interactive components (buttons, links, tables, list items) use ease-in-out transitions with a duration of 0.2s.

3. Dark Mode Configuration

The portal supports a dark mode. Toggling changes root CSS variables (backgrounds, borders, font colors) dynamically. The system stores the selection in localStorage, updating the user stylesheet immediately on DOM load to prevent screen flashes.
